

HAVE YOU BEEN DIAGNOSED WITH STAGE 3 OR STAGE 4 COLON CANCER?

Life University's Center for Chiropractic Research is seeking participants for a study examining the effects of chiropractic care on patient with colon cancer.

You may qualify if you:

- Have been diagnosed with stage 3 or stage 4 colon cancer.
- Are receiving care from your medical doctor for your colon cancer.
- Are age 18 or older.

For more information and to verify qualification details, contact:
770.426.2639, email
Research.Studies@life.edu or
click/scan the QR code.

The study will include 3 visits to the midtown lab and 6 weeks of chiropractic care. The study will take place over the course of approximately 6 weeks. This study will provide information about the effects of chiropractic care on patients with colon cancer. This study has been approved by the Life University Institutional Review Board.
